Continuation of 5. does NOT place the application in condition for allowance because: of the reasons set forth in the prior office action. The arguments presented in the reply are not persuasive. Particularly, the argued limitation, i.e., narrowed definition of base composition, and performance agents, are not in the claims. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See In re Van Geuns, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Further, Rath teaches the method of customization of cosmetic product by providing a base composition and a plurality of variable performing agents which may be selected by customers. The components in the base composiiton would be obviously depend on the type of cosmetics, or the type customers, which would have been a matter of optimization of result effective parameters.
